Program
(for eligible US patients)

RELiZORB® (IMMOBILIZED LIPASE) CARTRIDGE is indicated for use in pediatric patients (ages 2 years and above) and adult patients to hydrolyze fats in enteral formula. RELiZORB is for use with enteral feeding only; do not connect to intravenous or other medical tubing. Medications should not be administered through RELiZORB. For more information, including full safety information, please see RELiZORB Patient Guide and Instructions for Use at relizorb.com.
